MRC COMPONENTS

Fast and Precise Dielectric Measurements of Thin Layers with help of the Vector Network Analyzer ZNA

COMTEST ENGINEERING

Immunity Testing in Reverberation Chamber (RVC) and in Absorber Lined Shielded Enclosure (ALSE) with BBA300 and Elektra. The following antennas were installed in the LUV400 chamber: HF907, HL223, HL040E, HL025Z1BBA300 CDE, HK116E.

RADITEQ B.V.

RadiLink analog RF fiber optic system for measuring an RF signal with an antenna and conversion to fiber optic over distance and reconvert it to RF which is measured by the FPL1007

DATATEC AG

FPL1007, a 7.5 GHz spectrum analyzer with additional EMI PreCompliance function. Both conducted and radiated PreCompliance measurements can be carried out.
