

Test and measurement equipment for production must be reliable, easily adaptable, high-performing and upgradeable. In short: worth your investment. That's where Rohde & Schwarz comes into play.

You are about to install a new production line for mobile phones or other RF products? You want to extend or improve an existing production line? Then you should take a look at our proven state-of-the-art T&M portfolio. Why? Because our name is synonymous with technological leadership, quality and low total cost of ownership. Our products are designed to cover all production-relevant aspects: maximum throughput, small footprint, flexible configuration and easy upgradeability due to platform concepts, low energy consumption, low noise emission and easy operation. Being an RF instrument manufacturer ourselves, we know exactly what matters in all stages of the process chain and we offer the right solutions.

All major wireless standards

LTE, HSPA+, GSM/EDGE, WiMAX™, CDMA2000®, 1xEV-DO, WLAN, RFID/NFC, GPS/Galileo/Glonass, DVB-T/T2, ATSC, ISDB-T and more

All stages of the manufacturing process

Module assembly, final production and final testing in high volume, low mix and low volume, high mix environments

All product categories

RF and microwave signal generators and analyzers, audio analyzers, network analyzers, wireless testers for cellular and non-cellular mobile radio and TV standards, oscilloscopes, power meters, in-circuit testers, customized test systems and more

Where you need it, the way you need it

The Rohde & Schwarz sales and service network spans the globe – so we are local no matter where you are. Our customers enjoy industry-leading service, with realtime, person-to-person technical support everywhere in the world. Service locations in over 70 countries and technical support centers in North America, Asia and Europe assure fast access at all times. We are committed to customer satisfaction, which is why we stand fully behind the quality of our service, with no hidden terms. We provide the level of support you need, from complete turnkey service contracts to self-service options for customers who prefer to keep all maintenance, calibration and repair in-house.

Service you can rely on

- Worldwide
- Local and personalized
- Customized and flexible
- Uncompromising quality
- Long-term dependability

About Rohde & Schwarz

Rohde & Schwarz is an independent group of companies specializing in electronics. It is a leading supplier of solutions in the fields of test and measurement, broadcasting, radio-monitoring and radiolocation, as well as secure communications. Established more than 75 years ago, Rohde & Schwarz has a global presence and a dedicated service network in over 70 countries. Company headquarters are in Munich, Germany.

Environmental commitment

- Energy-efficient products
- Continuous improvement in environmental sustainability
- ISO 14001-certified environmental management system

Certified Quality System
ISO 9001

Manufacturing process stages

Rohde & Schwarz test and measurement solutions for production stand for high throughput, flexible adaptation to changing requirements, latest technologies and future-ready platform concepts.

Board level, module and final testing

Measurement tasks	Recommended products	Top features
Mobile phone production Standard-compliant testing of the air interfaces of wireless devices	 R&S®CMW500 wideband radio communication tester	<ul style="list-style-type: none">Unique all-in-one test platform: all wireless and broadcast standards in one box, e.g. LTE with MIMO, WLAN, DVB-TMulti-RAT handover testApplicable from RF and protocol tests to end-to-end tests
Multiport and parallel testing Parallel filter, amplifier, mixer and antenna testing as well as RF module testing	 R&S®ZVT vector network analyzer	<ul style="list-style-type: none">High-speed measurements at up to eight ports with four independent sources and 16 receiversUnique measurement capabilities up to 20 GHzTruly parallel measurement for highest throughputSupport of switch matrices
Radar, satellite, wireless infrastructure and consumer electronics products Signal generation and analysis for transmitter and receiver testing	 R&S®SGS100A RF source	<ul style="list-style-type: none">Smallest fully integrated RF signal generator up to 12.75 GHz (1/2 x 19", 1HU)CW only or vector signal generator modelVery short setting times for high throughputWearfree electronic attenuator
	 R&S®SMB100A RF and microwave signal generator	<ul style="list-style-type: none">Compact analog signal source up to 40 GHzHigh output powerWearfree electronic attenuator up to 12.75 GHz
	 R&S®FSV signal and spectrum analyzer	<ul style="list-style-type: none">Industry-leading speed for maximum throughputEasy on-site upgrading with optionsFrequency range up to 40 GHzSupport of all major wireless standards

Measurement tasks	Recommended products	Top features
Transmitter power testing Precise power measurement of CW signals, digital or analog modulated signals as well as pulsed RF signals	 R&S®NRP-Z power sensors	<ul style="list-style-type: none">Large portfolio of different sensor types with USB connector for easy useHighest accuracy and speedDynamic range up to 90 dB
Active and passive device testing Filter tuning and filter, amplifier, mixer and antenna testing	 R&S®ZNB and R&S®ZNC vector network analyzers	<ul style="list-style-type: none">Very fast and accurateEasy to operate on large touchscreenLong calibration intervalsCompact form factor
Production of broadcast tuners, components and receivers Terrestrial, satellite and cable interface RF testing	 R&S®SFE100 test transmitter system	<ul style="list-style-type: none">Centralized signal generation: just one system for the entire production siteMinimum space requirements, low power consumption and all major TV and audio broadcasting standards in one rackFlexible, upgradeable configuration to meet user requirements
Video and audio parameter testing, e.g. in TV production Adjustment of color, white point and gamma, audio testing	 R&S®SFC compact modulator	<ul style="list-style-type: none">Multistandard test signal generation for TV and audio broadcastingCompact and cost-effective
	 R&S®DSVG digital video signal generator	<ul style="list-style-type: none">Audio and video signal generation for analog TV, SDTV, HDTV, 3DCost-efficient one-box solutionImportant building block in test setups for measuring brightness, color, contrast and view angle of TV displays in combination with a spectrometer
	 R&S®UPP audio analyzer	<ul style="list-style-type: none">Cost-efficient solution, especially designed for productionCascadable to up to 48 active measurement channels, ideal e.g. for car audio applications

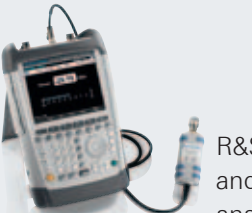

Rework and repair / quality control

Measurement tasks	Recommended products	Top features
Troubleshooting digital, analog and RF devices Signal analysis in the time and frequency domain	 R&S®RTO and R&S®RTM oscilloscopes	<ul style="list-style-type: none">Excellent measurement accuracy up to 4 GHzFast detection of signal faults due to industry-leading acquisition rate (R&S®RTO)Innovative user interface for maximum ease of operationProbes with built-in DC voltmeter
Troubleshooting receivers and transmitters Signal generation and analysis of radio, mobile phone, satellite and radar systems	 R&S®SMBV100A vector signal generator and R&S®FSV signal and spectrum analyzer	<ul style="list-style-type: none">Wide range of signal generation and analysis options for analog and digital modulation methods as well as for wireless standardsIntuitive graphical user interface (generator) and touchscreen (analyzer)
Repair of mobile phones Power consumption testing at module level, battery simulation	 R&S®CMW-Z10 RF shielding box, R&S®CMW500 wideband radio communication tester, R&S®CMWrun measurement software	<ul style="list-style-type: none">One tester for all mobile radio and wireless connectivity standardsPredefined test sequencesComplete solution including RF test chamber and software supportVarious RF test chambers available
Repair of broadcast tuners, components and receivers RF and reception parameter testing	 R&S®SFE broadcast tester	<ul style="list-style-type: none">Multistandard signal generator with additional testing capabilitiesDigital and analog TV and audio broadcasting standards in one boxHigh-quality RF modulator, universal real-time coder and diverse baseband signal sources in one

Customized test systems

Measurement tasks	Recommended products	Top features
Electronic assembly and module testing Analog and digital in-circuit testing, functional and high-power testing	 GT3000 test system based on the R&S®TSVP test platform	<ul style="list-style-type: none">Very compact board-testing solution with modular system architectureCompact PCI/PXI and CAN compliantManual, semi-automatic or in-line feeding of devices under testIntegrated vacuum and pneumatic interfaceUser-configurable
Transmitter and receiver testing Testing of devices with ISM band radio interface such as tire pressure sensors or remote keyless entry products	 R&S®TS7810 RF test system	<ul style="list-style-type: none">Quick adaptation to specific test requirements and scenarios for automotive, industrial and consumer devices
Shielding for RF tests on devices with radio interface	 R&S®TS712x shielded RF test chambers	<ul style="list-style-type: none">Manual or automatic opening and closingShielding up to 14 GHzIntegrated RF connectors and filter feedthroughsSupport of application-specific configurations

Maintenance

Measurement tasks	Recommended products	Top features
In-time detection of defective RF paths on the production line Cable loss, distance-to-fault, transmission and reflection measurements	 R&S®ZVL vector network analyzer	<ul style="list-style-type: none">Network analyzer, spectrum analyzer (option) and power meter (option) in one50 Ω and 75 Ω modelsMultitrace display for displaying all relevant parametersOptional battery operation
	 R&S®ZVH cable and antenna analyzer	<ul style="list-style-type: none">All functions required for cable and antenna measurementsOptional power meter, spectrum and vector network analyzerFlexible upgrade conceptUser-configurable test sequences (wizard)
