Make ideas real
This manual describes the following R&S®TSVP models:

- R&S®TS-PSM4
- R&S®TS-PRIO2

The following abbreviations are used throughout this manual: R&S®TS-PSM4 is abbreviated as R&S TS-PSM4 and R&S®TS-PRIO2 as R&S TS-PRIO2.

Contents

1 Safety information (multilingual)

This option or accessory is designed for a specific Rohde & Schwarz product. Multilingual safety information is delivered with the product. Follow the provided installation instructions.

Esta opción o este accesorio están diseñados para un producto Rohde & Schwarz concreto. El producto va acompañado de información de seguridad en varios idiomas. Siga las instrucciones de instalación puestas a disposición.

Diese Option oder dieses Zubehör ist für ein bestimmtes Rohde & Schwarz Produkt vorgesehen. Mit dem Produkt werden mehrsprachige Sicherheitsinformationen geliefert. Befolgen Sie die mitgelieferten Installationsanweisungen.

Cette option ou cet accessoire est conçu pour un produit Rohde & Schwarz spécifique. Des informations de sécurité multilingues sont fournies avec le produit. Suivez les instructions d'installation fournies.

Questa funzione opzionale o accessoria è progettata per un prodotto Rohde & Schwarz specifico. Con il prodotto sono fornite informazioni sulla sicurezza in formato multilingue. Seguire le istruzioni di installazione allegate.

Esta(e) opção ou acessório foi concebida(o) para um produto específico da Rohde & Schwarz. Serão fornecidas informações de segurança multilingues com o produto. Siga as instruções de instalação fornecidas.

Αυτή η προαιρετική επιλογή ή εξάρτημα έχει σχεδιαστεί για συγκεκριμένο προϊόν Rohde & Schwarz. Μαζί με το προϊόν παρέχονται πληροφορίες ασφαλείας σε πολλές γλώσσες. Ακολουθήστε τις παρεχόμενες οδηγίες εγκατάστασης.

Din l-għażla jew aċċessorju huma mfassla għal prodott Rohde & Schwarz speċifiku. L-informazzjoni multilingwi dwar is-sikurezza hija pprovduta mal-prodott. Segwi l-istruzzjonijiet ipprovduti għall-installazzjoni.

Deze optie of dit accessoire is ontwikkeld voor een specifiek product van Rohde & Schwarz. Het product wordt geleverd met veiligheidsinformatie in meerdere talen. Volg de meegeleverde installatie-instructies.

Denne mulighed eller tilbehørsdel er designet til et specifikt Rohde & Schwarz produkt. En flersproget sikkerhedsanvisning leveres sammen med produktet. Følg de medfølgende installationsanvisninger.

Detta tillval eller tillbehör är avsett för en särskild produkt från Rohde & Schwarz. Säkerhetsinformation på flera språk medföljer produkten. Följ de medföljande installationsanvisningarna.

Tämä vaihtoehto tai lisävaruste on suunniteltu tietylle Rohde & Schwarz -yrityksen tuotteelle. Tuotteen mukana on toimitettu monikieliset turvallisuusohjeet. Noudata annettuja asennusohjeita.

Dette alternativet eller ekstrautstyret er utformet for et spesifikt Rohde & Schwarz produkt. Flerspråklig sikkerhetsinformasjon leveres med produktet. Overhold installasjonsveiledningen som følger med.

See valik või lisaseade on mõeldud konkreetsele Rohde & Schwarz tootele. Tootega on kaasas mitmekeelne ohutusteave. Järgige kaasasolevaid paigaldusjuhiseid.

Šī opcija vai piederums ir izstrādāts īpaši Rohde & Schwarz produktam. Produktam pievienota drošības informācija vairākās valodās. Ievērojiet sniegtos uzstādīšanas norādījumus.

Ši parinktis ar priedas skirti konkrečiam Rohde & Schwarz gaminiui. Su gaminiu pateikiama saugos informacijos keliomis kalbomis. Laikykitės pateikiamų montavimo nurodymų.

Þessi auka- eða fylgibúnaður er hannaður fyrir tiltekna Rohde & Schwarz vöru. Öryggisupplýsingar á mörgum tungumálum fylgja með vörunni. Fylgið meðfylgjandi uppsetningarleiðbeiningum.

Tá an rogha nó an oiriúint seo ceaptha le haghaidh táirge Rohde & Schwarz sonrach. Cuirtear eolas sábháilteachta ilteangach ar fáil leis an táirge. Lean na treoracha suiteála a thugtar.

Эта опция или принадлежность предназначена для конкретного продукта Rohde & Schwarz. В комплект поставки продукта входят инструкции по технике безопасности на нескольких языках. Соблюдайте прилагаемые инструкции по установке.

Ця опція або приладдя призначені для конкретного виробу Rohde & Schwarz. Інструкції з техніки безпеки кількома мовами постачаються разом із виробом. Дотримуйтеся наданих інструкцій зі встановлення.

Ta opcja lub akcesorium jest przeznaczone do określonego produktu Rohde & Schwarz. Dostarczany produkt zawiera informacje w wielu językach dotyczące bezpieczeństwa. Należy postępować zgodnie z dostarczonymi instrukcjami instalacji.

Tato varianta nebo příslušenství je určeno pro konkrétní produkt Rohde & Schwarz. S produktem jsou dodávány vícejazyčné bezpečnostní informace. Řiďte se přiloženými pokyny k instalaci.

Táto verzia alebo príslušenstvo je navrhnutá pre špecifický výrobok Rohde & Schwarz. S výrobkom sa dodávajú viacjazyčné bezpečnostné pokyny. Riaďte sa dodanými pokynmi na inštaláciu.

Ta možnost ali dodatek je zasnovan za določen izdelek podjetja Rohde & Schwarz. Izdelku so priložena varnostna navodila v več jezikih. Upoštevajte priložena navodila za namestitev.

Ezt a beállítást vagy tartozékot egy adott Rohde & Schwarz termékhez tervezték. A termékhez többnyelvű biztonsági információt mellékelünk. Kövesse a mellékelt szerelési utasításokat.

Тази опция или аксесоар са проектирани за специфичен продукт на Rohde & Schwarz. Многоезикова информация за безопасност се доставя с продукта. Следвайте предоставените инструкции за монтаж.

Ova opcija ili oprema namijenjena je za određeni proizvod tvrtke Rohde & Schwarz. Uz proizvod su dostavljene sigurnosne napomene na više jezika. Pratite isporučene upute za ugradnju.

Ova opcija ili pribor je dizajniran za određeni Rohde & Schwarz proizvod. Proizvodu su priložene sigurnosne informacije na više jezika. Slijedite priložena uputstva za instalaciju.

Ova opcija ili dodatni pribor je projektovan za određeni Rohde & Schwarz proizvod. Bezbednosne informacije na više jezika se isporučuju uz proizvod. Sledite dostavljena uputstva za instalaciju.

Această opțiune sau acest accesoriu a fost conceput pentru un produs specific Rohde & Schwarz. Informațiile multilingve privind siguranța sunt livrate împreună cu produsul. Urmați instrucțiunile de instalare furnizate.

Ky opsion ose aksesor është krijuar për një produkt specifik Rohde & Schwarz. Bashkë me produktin jepen edhe informacionet e sigurisë në shumë gjuhë. Ndiqni udhëzimet e dhëna të instalimit.

Оваа опција или додаток се намSTATETи за одреден производ на Rohde & Schwarz. Со производот се испорачани повеќејазични безбедносни упатства. Следете ги дадените упатства за инсталација.

Bu opsiyon veya aksesuar, belirli bir Rohde & Schwarz ürünü için tasarlanmıştır. Çok dilli güvenlik uyarıları ürünle birlikte teslim edilir. Size sağlanan kurulum talimatlarına uyun.

אפשרות זו או האביזר מיועדים למוצר ספציפי של Rohde & Schwarz. מידע רב-לשוני בנושא בטיחות מצורף למוצר. יש לפעול בהתאם להנחיות ההתקנה המצורפות.

تم تصميم هذا الخيار أو الملحق لمنتج معين من منتجات Rohde & Schwarz. يتم تزويد معلومات السلامة متعددة اللغات مع المنتج. اتبع تعليمات التركيب الموضحة.

این قابلیت یا وسیله جانبی منحصراً برای محصول به خصوص Rohde & Schwarz طراحی شده است. اطلاعات ایمنی چندزبانه همراه این دستگاه ارائه شده است. دستورالعمل‌های نصب ارائه شده را دنبال کنید.

اس اختیار یا حصے کو مخصوص Rohde & Schwarz پروڈکٹ کے لئے تیار کیا گیا ہے۔ پروڈکٹ کے ساتھ کثیر السانی زبانوں میں تحفظ کی معلومات فراہم کی جاتی ہیں۔ فراہم کردہ تنصیب کی ہدایات پر عمل کریں۔

Şu opsiýa ýa-da esbap Rohde & Schwarz anyk önüm üçin niýetlenilen. Dürli dildäki howpsuzlyk barada maglumat önüm bilen bile üpjün edilýär. Üpjün edilen gurnama ugrukdyrmalaryny ýerine ýetiriň.

इस विकल्प या एक्सेसरी को एक विशेष Rohde & Schwarz उत्पाद के लिए डिज़ाइन किया गया है. उत्पाद के साथ बहुभाषी सुरक्षा जानकारी दी जाती है. प्रदान किए गए इंस्टालेशन अनुदेशों का पालन करें.

2 Documentation overview

This section provides an overview of the R&S TSVP (test system versatile platform) user documentation.

All documents are delivered with the Generic Test Software Library ("R&S GTSL") installation package. After installing the software, you can open all the documentation from the Windows "Start" menu. Additionally, you can find detailed information about the software interfaces in the "R&S GTSL Help" folder in the Windows "Start" menu.

The user documentation and "R&S GTSL" installation package are also available for download in GLORIS at:

https://gloris.rohde-schwarz.com/

For details, see the R&S TSVP Getting Started manual.

2.1 Getting started manual

Introduces the R&S TSVP (test system versatile platform) and describes how to set up and start working with the product. It includes safety information.

A printed version is delivered with the instrument.

2.2 User manuals

Separate manuals are provided for the base units, the individual plug-in module types, as well as for the control software and the calibration tool:

- Base unit manual
  The base unit user manuals introduce the base units and describes how to set up and operate the product. It includes safety information and information on maintenance and instrument interfaces. It includes the contents of the getting started manual.
- Plug-in module manuals
  Contain the description of the specific modules. Basic information on setting up the R&S TSVP (test system versatile platform) is not included.
- In-System calibration user manuals
  Provide all the information required for installation and operation of the in-system calibration R&S TS-ISC solution.
- Control software
  - R&S GTSL
    Generic Test Software Library
  - R&S EGTSL
    Enhanced Generic Test Software Library
  - R&S IC-Check

Generic Test Software Library

2.3 System manual

Describes the complete R&S TSVP (test system versatile platform) as a whole, including the combined use of R&S CompactTSVP and R&S PowerTSVP, plug-in modules and generic test software. It also includes typical use cases.

Additionally, it describes known installation problems (hardware and software) along with possible solutions.

2.4 Service manual

Describes the self-test to check correct operation, troubleshooting and fault elimination, and contains mechanical drawings and spare part lists.

2.5 Printed safety instructions

Provides safety information in many languages. The printed document is delivered with the product.

2.6 Brochures and specifications

Separate brochures are provided for the base unit, the individual plug-in module types, as well as for the control software. The brochures provide an overview of the base units and each additional module, and also contain the technical specifications. They also list the hardware options and their order numbers, and optional accessories.

2.7 Release notes and open source acknowledgment

The release notes list new features, improvements and known issues of the current software version. In addition, the available firmware versions and the firmware update procedure for plug-in modules are described.

The open-source acknowledgment document provides verbatim license texts of the used open source software.

3 Welcome to the R&S TS-PSM4

The Rohde & Schwarz high-power switch module R&S TS-PSM4 is intended for use in the R&S TSVP chassis. The module occupies one slot. Control of the module is via the CAN bus.

The module is available in two versions:

- It can be ordered with a connector of the Virginia Panel Corp. (VPC) on the front of the module as R&S TS-PSM4 (variant 03), order no. 1519.2622.03. The connector is connected to the individual channels of the module via terminals on the base board using a pre-assembled cable set.
- The R&S TS-PSM4B (variant 02), order no. 1519.2622.02, is delivered without VPC, the user can connect his loads or power supply units with his own cables via apertures on the front plate of the module to the terminals of the channels.

A soft panel is available for operating the R&S TS-PSM4. Control is via an IVI switch driver.

Features of the R&S TS-PSM4

- Control via CAN bus
- Twelve high power channels for currents up to 16 A
- Eight low power channels for currents up to 2 A
- Switching of voltages up to 30 V
- Current measurement capabilities using shunt resistors
- Feed-through of all channels to the rear of the R&S PowerTSVP chassis by means of R&S TS-PRIO2 Rear-I/O-Module possible
- Feed-through of all channels to the rear of the R&S CompactTSVP chassis by means of optional R&S TS-PK04 cable set possible
- Support via R&S Signal Routing Library
- Self-test capability
- Soft panel for interactive operation
- IVI switch driver available

(i) In permanent operation of the 16 A relays with low switching voltages and low switching currents there is a risk of an increase in the contact resistance due to a forming film on the contact surfaces. It is therefore recommended to regularly switch the contacts under load (eg. 5 A / 12 V).

Features of the R&S TS-PRIO2

- Direct routing of all low-power channels to the rear panel of the chassis R&S PowerTSVP.
- Direct routing of all high-power channels to the rear panel of the chassis R&S PowerTSVP.

4 Module tour

The R&S TS-PSM4 can consist of several hardware components, depending on your setup.

4.1 R&S TS-PSM4

The R&S TS-PSM4 is available in two variants.

- R&S TS-PSM4 (variant .03)
- R&S TS-PSM4B (variant .02)

The main difference from a functional view between the two variants is that the R&S TS-PSM4B does not have a connector on the front panel. Variant .02 instead has openings for cables on its front.

The cabling of the connector (VPC) mounted on the front of the R&S TS-PSM4 (variant 03) with the appropriate terminals on the base board has already been done.

X10
Figure 4-1: Front panel of the R&S TS-PSM4 variant 03

LEDs = Chapter 4.1.1, "Status LEDs", on page 15 (behind connector, not visible in image)
X10   = Chapter 4.1.3, "Connector X10", on page 16

Figure 4-2: Rear panel of the R&S TS-PSM4 (incl. PXI expansion for connection to module on rear panel)

X1 = Chapter 4.1.2, "Connector X1", on page 16
X20 = Chapter 4.1.4, "Connector X20", on page 16
X30 = Chapter 4.1.5, "Connector X30", on page 16

4.1.1 Status LEDs

The LEDs on the front indicate the current status of the module.

- "PWR" (green LED)
  Indicates that all necessary supply voltages are present.
- "COM" (yellow LED)
  Indicates data exchange via the interface.
- "ERR" (red LED)
  Indicates an error condition if illuminated.

4.1.2 Connector X1

Interface to connect the R&S TS-PRIO2 rear I/O module to the R&S TS-PSM4.

- Connector X1 connects channels 9 to 20 to the R&S TS-PRIO2 when you use that optional module in a R&S PowerTSVP.
- Connector X1 alernatively connects channels 9 to 20 to the R&S TS-PK04 cable set.

See Chapter C.1.1, "Connector X1", on page 44 for a detailed description of the connectors.

4.1.3 Connector X10

Type: VPC

Available on the R&S TS-PSM4, variant .03.

Interface to connect UUTs to the module via Virginia Panel Corp. GEMINI test receivers.

See Chapter C.1.2, "Connector X10 (only R&S TS-PSM4 (variant 03))", on page 45 for a detailed description of the connectors.

4.1.4 Connector X20

Type: PXI extension

Interface to connect channels 1 to 8 to the R&S TS-PRIO2 when you use that optional module in a R&S PowerTSVP.

See Chapter C.1.3, "Connector X20", on page 46 for a detailed description of the connectors.

4.1.5 Connector X30

Interface for analogue bus access for self-test and current measurement.

See Chapter C.1.4, "Connector X30", on page 48 for a detailed description of the connectors.

4.2 R&S TS-PRIO2

The R&S TS-PRIO2 is an optional rear panel I/O module that you can connect with the R&S TS-PSM4 in a R&S PowerTSVP. The R&S TS-PRIO2 provides a feed-through of all channels of the R&S TS-PSM4 module to the rear panel of the R&S PowerTSVP.

Figure 4-3: Front panel of the R&S TS-PRIO2

X1 / X2   = Chapter 4.2.1, "Connectors X1 to X5", on page 18
X3 / X4 / X5 = Chapter 4.2.1, "Connectors X1 to X5", on page 18
Figure 4-4: Rear panel of the R&S TS-PRIO2

X11 = Chapter 4.2.2, "Connector X11", on page 19
X20 = Chapter 4.2.3, "Connector X20", on page 19

The R&S TS-PRIO2 module holds fuses for the low current channels. See Chapter 8.1, "Changing fuses", on page 38 about information on how to replace blown fuses.

The high current channels fuses are not protected by fuses. We recommend to provide external assurance measures when adapting the module.

4.2.1 Connectors X1 to X5

Type (X1 / X2): PTSM 0.5/ 4-2.5-H THR R32 - 1770908 (manufacturer: Phoenix Contact)

Type (X3 / X4 / X5): SPT 1,5/ 4-H-3.5 - 1990753 (manufacturer: Phoenix Contact)

- X1 / X2: Interface to connect loads or supply units to the low current channels 1 to 8 of the R&S TS-PSM4.
  Connectors X1 and X2 can take wires with a maximum of 0.5 mm^2 cross-section surface.
- X3 / X4 / X5: Interface to connect loads or supply units to the high current channels 9 to 20 of the R&S TS-PSM4.
  Connectors X3, X4 and X5 are suitable for wires with a maximum of 1,5 mm^2 cross-section surface.

See Chapter C.2.3, "Connector X1 and X2", on page 52 and Chapter C.2.4, "Connector X3, X4 and X5", on page 53 for a detailed description of the connectors.

4.2.2 Connector X11

Interface to connect channels 9 to 20 from the R&S TS-PRIO2 rear I/O module to the R&S TS-PSM4.

See Chapter C.2.1, "Connector X11", on page 49 for a detailed description of the connectors.

4.2.3 Connector X20

Type: PXI extension

Interface to connect channels 1 to 8 to the R&S TS-PSM4.

See Chapter C.2.2, "Connector X20", on page 50 for a detailed description of the connectors.

4.3 R&S TS-PK04 and -PK04P

The cable sets R&S TS-PK04 and R&S TS-PK04P (for R&S PowerTSVP) allow access to the 16 A high current channels 9 to 20 and all 2 A channels of the R&S TS-PSM4 through connectors X3 and X4 on the rear of the R&S CompactTSVP or R&S PowerTSVP.

To use this feature, install the R&S TS-PSM4 in slot 16 of the chassis.
Figure 4-5: Overview of the R&S TS-PSM4 with R&S TS-PK04 in the R&S CompactTSVP

In Figure 4-6 the installation of the R&S TS-PK04 cable set in the R&S CompactTSVP and its connections to the R&S TS-PSM4 (here shown in simplified form) is shown.
Figure 4-6: R&S TS-PK04 installation in R&S CompactTSVP

4.3.1   Connector X1

Interface of the high current channels 9 to 20 to the R&S TS-PSM4.

4.3.2   Connectors X3 and X4

Interface of the low current channels 1 to 8 and the high current channels 9 to 20 to the load or voltage source.

See Chapter C.3.1, "Connector X3", on page 54 and Chapter C.3.2, "Connector X4", on page 55 for a detailed description of the connectors.

4.3.3   Connector X20

Interface of low current channels 1 to 8 to the R&S TS-PSM4.

5 Installing the module

5.1 Installing the R&S TS-PSM4

The R&S TS-PSM4 is a module installed at the front panel of the R&S TSVP base unit.

Note on slots usage in PXI based R&S TSVP base units:

- In slots 5 to 14, operating the R&S TS-PSM4 requires modules R&S TS-PRIO or R&S TS-PRIO4 on the corresponding rear slot. This is the only way that the R&S TS-PSM4 can be connected to the necessary power supply in these slots.
- Using slots 15 or 16 has no such restrictions.
- Installing the R&S TS-PRIO2 is not possible in PXI based R&S TSVP base units.

Note on slot usage in R&S PowerTSVP:

- Installing the R&S TS-PSM4 is possible in slots 1 to 16.
- We recommend not to use slot 1 of the R&S PowerTSVP, because sensitive components of the module can be damaged by the adjacent power supply. If you must use slot 1 to install the R&S TS-PSM4, make sure there is no point of contact between the power supply and the module, for example by using the insulation plate that is part of the base unit (see the getting started for details).
- Installing the R&S TS-PRIO2 is supported in rear slots 1 to 14.

If the R&S TS-PSM4 is operated in slot 16 on either R&S CompactTSVP or R&S PowerTSVP, you can run all low and high power channels on the rear of the chassis via the optional R&S TS-PK04 / -PK04P cable set.

1. Install the module as described in the user manuals of the base units.

   For additional information about installing the R&S TS-PSM4 and its optional accessories, see:
   - Chapter 5.2, "Preparing the R&S TS-PSM4B (variant .02)", on page 22
   - Chapter 5.3, "Installing the R&S TS-PRIO2", on page 25

2. **WARNING!** Risk of electric shock. The test environment, e.g the UUT or additional power supplies, can supply high voltages to the instruments. In this case, the voltage can also apply to the signal output connectors of the R&S TSVP, in particular the analog bus connector X2.
   Therefore, do not connect or disconnect devices from the X2 connectors while connected to an external power supply or UUT.

   Always connect both ends of the cable connecting the R&S CompactTSVP and R&S PowerTSVP. Thus, you avoid the risk of touching the X2 connector with a possibly hazardous voltage applied.

   Take the system into operation as described in the user manuals of the base units.

5.2 Preparing the R&S TS-PSM4B (variant .02)

Compared to the completely cabled R&S TS-PSM4 (variant .03 - with mounted VPC connector), the R&S TS-PSM4B (variant 02) does not have channel wiring and has a simple front plate. Using the R&S TS-PSM4B, you can wire the channels as you need. To do so, connect suitable cables from the terminals of the individual channels on the module base board through the front plate openings to a load or power source.

Figure 5-1 shows the position of the connecting terminals on the base board.
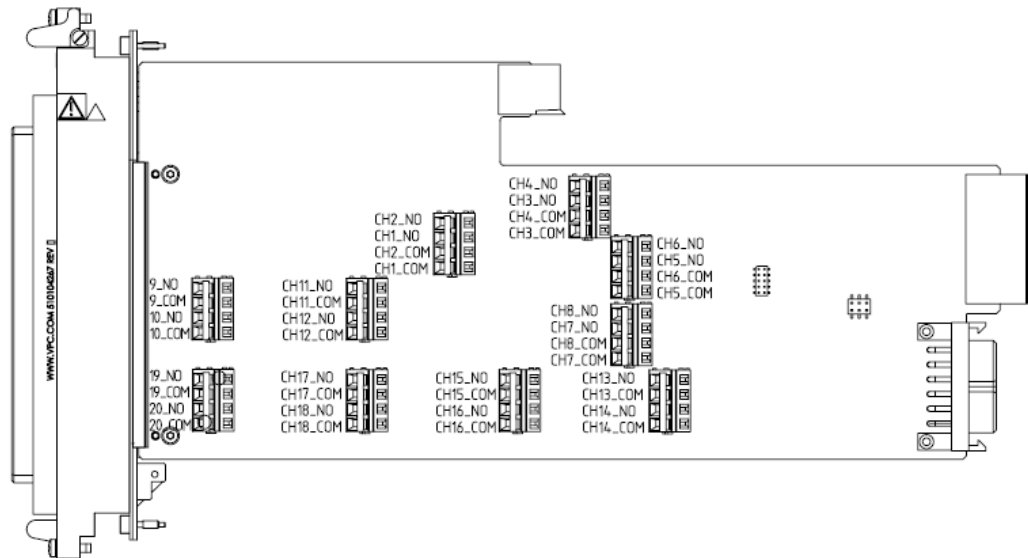

Figure 5-1: Position of the connecting terminals on the base board

Mounting the terminal wires of high current channels (channels 9 to 20)

1. Open the terminal contact CH16_COM to be able to connect a wire to channels 9 to 20.

   a) Place a flat-head screwdriver in the upper square opening of the terminal.
   b) Press down the metal spring with a slight levering action.

c) Carefully push the screwdriver into the terminal as far as it goes.
Leave the screwdriver in the terminal.
Figure 5-2: Opening the terminal contact CH16_COM
Figure 5-3: Press down the metal spring in the upper opening of the terminal

2. Insert the wire into the exposed lower opening.
To establish a good connection the wire must be free of its insulation by a length of about 6 mm.
Figure 5-4: The wire can be mounted in the lower round opening

3. Remove the screwdriver.
    The metal spring will spring back and clamp the inserted wire firmly and form a good connection with low contact resistance.
Figure 5-5: Mounted wire in clamp

In the identical terminals of the high-power and low-power channels of the R&S TS-PSM4 (variant 03) wires labelled AWG 14 are finely stranded. The wires are each mounted without ferrules in the terminals. More information on this terminal can be obtained from the manufacturer WAGO.

Table 5-1: Specification of wires

AWG	d (mm)	A (mm²)	R (Ω/km)
14	1,63	2,08	8,55

The terminal is labelled as follows:

- Serie 236 THR (5 mm / 0.08 - 2,5 mm²),

- Order no.: 236-404/334-604

Figure 5-6 shows an example of a completely wired R&S TS-PSM4B.
Figure 5-6: R&S TS-PSM4 (variant 03)

5.3 Installing the R&S TS-PRIO2

The R&S-TS-PRIO2 is a module installed at the rear of the R&S PowerTSVP.

For a detailed description on how to install modules, refer to the user manual of the R&S PowerTSVP.

6 Functions

6.1 R&S TS-PSM4

(see Chapter B, "Block diagram", on page 43)

6.1.1 Signal concept

The power relays of all channels of the R&S TS-PSM4 can be wired up with power supplies or loads via the front of the module. In addition all channels can be routed to the rear of the R&S PowerTSVP chassis via the optional R&S TS-PRIO2 Rear-I/O-Module. In the R&S CompactTSVP chassis there is the option to route all low power channels and high power channels to the rear via the R&S TS-PK04 cable set.

Each channel can be used as a sense line or power line in order to create a connection between load and power supply unit.

The voltage drop corresponding to the current flow through each channel of the R&S TS-PSM4 can be measured via 22 mΩ shunt resistors on the low power channels and 5 mΩ shunt resistors on the high power channels via the chassis's analogue bus. The exact level of the shunt resistors is determined when calibrating the module. These values are used for calculating the actual current through the channel. The amount of current through a channel can be retrieved from the module via the IVI switch driver when the measured voltage level is specified.

The R&S TS-PSM4 (variant 03) can be ordered with a Virginia Panel Corp. (VPC) connector on the front of the module. The connector is connected to the individual channels of the module via terminals on the switch card using a pre-assembled cable set. In the R&S TS-PSM4B (variant 02) without VPC the user can connect his loads or power supply units with his own cables via apertures on the front plate of the module to the terminals of the channels.

More information about the terminals and cables required follow later in this document.

6.1.2 System functions

The system functions are implemented by a local processor with internal Flash. There is also an external FRAM. The cycle counters of all relays on the R&S TS-PSM4 are located in the FRAM. The readings can be retrieved from the module via the IVI switch driver.

The functions of the R&S TS-PSM4 can be summarized as follows:

- Analog function test
- Connection of voltage/current sources
- Connection of test component loads
  (original loads, simulated/electronic load)

● Switch simulation

6.1.3 Application examples

6.1.3.1 Measuring current during active load

A typical application example for the use of a R&S TS-PSM4 module is connection of a load to a voltage supply. In the example shown below (Figure 6-1) the voltage supply is connected to the COM lines on the rear of the R&S TS-PSM4 . This can be done by installing the R&S TS-PK04 / -PK04P cable set or the R&S TS-PRIO2. The load is connected to the NO lines located on the front of the R&S TS-PSM4 . The voltage supply's force lines are introduced to the load via two 16 A high power channels , whereas the sense lines are run via 2 A low power channels.

*Figure 6-1: Application example - measuring current with active load*

The relatively high current , which in the load's switched on active state flows through the high power channels, can be determined via a 5 mΩ shunt resistor. The voltage drop at the shunt resistor is conducted via the R&S TS-PSM4's matrix- or coupling relays to the analogue bus of the chassis and from there to, for example, the R&S TS-

PSAM measurement module. The measurement module's voltmeter ascertains the voltage. Via the rspsm4_GetCalculatedCurrent function of the IVI software driver that is part of the R&S TS-PSM4, the current belonging to this voltage level can be retrieved. It is calculated via correction values stored on the module. See also the programming example later on in this document.

The current paths are coloured red in the diagram above, the lines with sense voltage are blue and the paths over which the voltage drop on the shunt resistor is measured are coloured green.

6.1.3.2 Current measurement with load in standby mode

If now the small amount of residual current through the load is to be determined, if the latter is in standby mode, another version of the switching is chosen.

Small currents up to one ampere can be measured directly from the R&S TS-PSAM module's ammeter. If the current measurement gives a value via the high power channel's shunt resistor that is less than or equal to 1 A, then the switching as shown in Figure 6-2 can be used for the current measurement. With the channel 9 high power relay opened, the entire current is conducted via matrix- and coupling relays on the analogue bus and from there to the ampere meter of the R&S TS-PSAM's measurement module. These lines are coloured red.
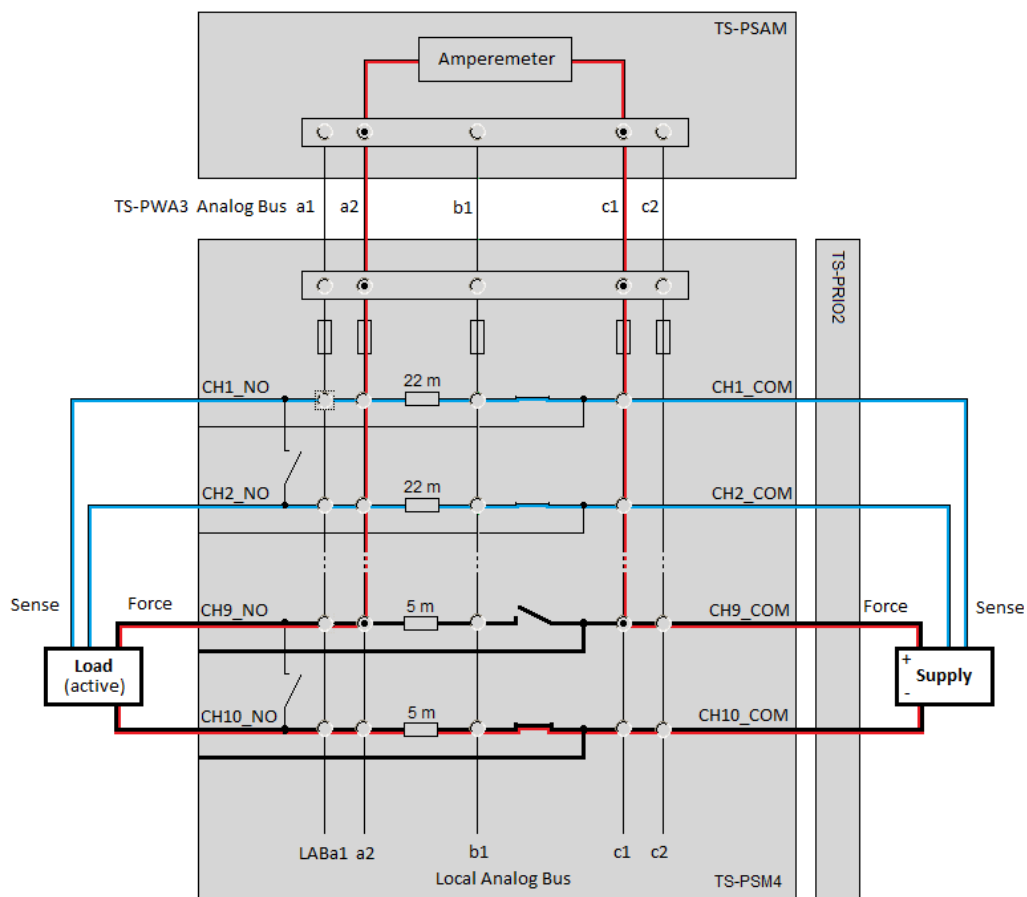

Figure 6-2: Application example - current measurement with load in standby mode

7 Software

7.1 Driver software

A LabWindows IVI driver that supports the class IVI SWTCH is available to control the High-Power Switch Module R&S TS-PSM4 All additional functions of the hardware are supported by specific extensions of the driver. The driver is a component of the ROHDE & SCHWARZ GTSL software. All functions of the driver are documented extensively in online Help and in the LabWindows/CVI Function Panels.

During driver installation, the following software modules are installed:

Table 7-1: Driver installation R&S TS-PSM4

Module	Path	Comment
rspsm4.dll	`<GTSL directory>\Bin`	Driver
rspsm4.chm	`<GTSL directory>\Bin`	Help files
rspsm4.fp	`<GTSL directory>\Bin`	LabWindows CVI Function Panel file, function panels for CVI development interface
rspsm4.sub	`<GTSL directory>\Bin`	LabWindows CVI attribute file. This file is required by some „function panels".
rspsm4.lib	`<GTSL directory>\Bin`	Import Library
rspsm4.h	`<GTSL directory>\ Include`	Header file for the driver

ⓘ To use the driver, the IVI and VISA libraries from National Instruments are necessary.

7.2 Softpanel

The software package of the R&S TS-PSM4 includes a so-called softpanel. The softpanel enables interactive operation of the module.
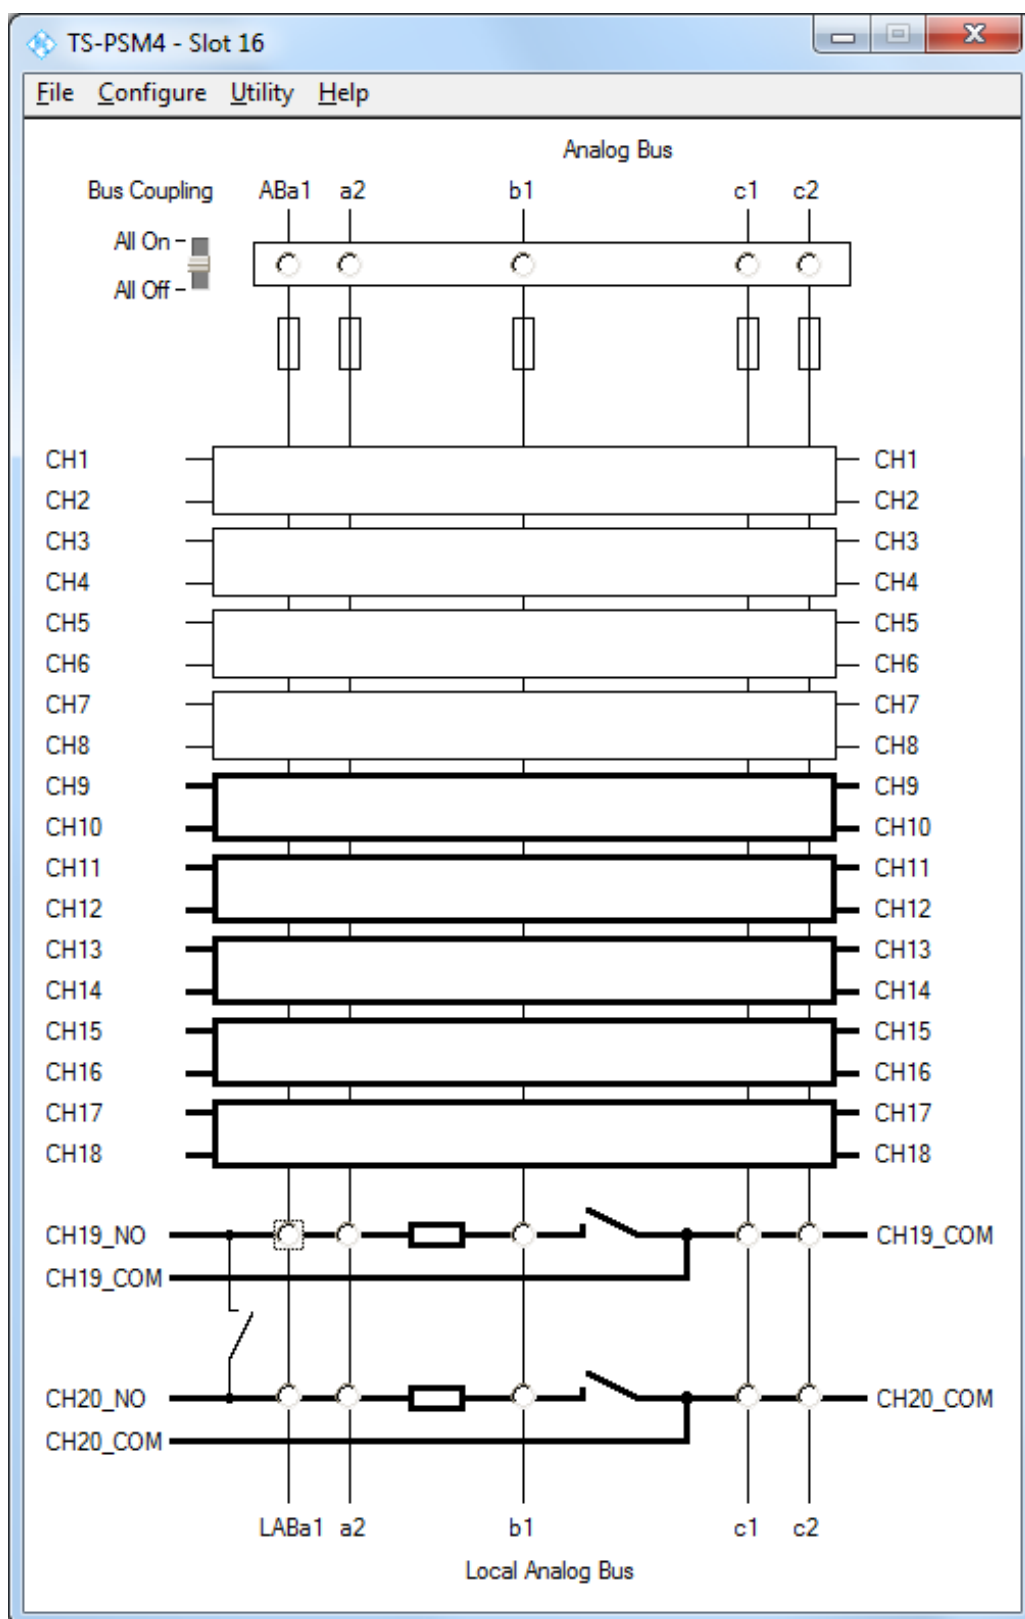

Figure 7-1: Softpanel R&S TS-PSM4

7.3 Programming with GTSL libraries

```
/*

  This example connects an external power supply to a load via TS-PSM4
  channels 9 and 10. The power supply is connected to CH9_COM and
  CH10_COM at the rear of the module TS-PSM4 and the load is connected
  to CH9_NO and CH10_NO at the front of the module. The sense-lines of
  the power supply are routed to the load via TS-PSM4 channels 1 and 2.
  The current through channel 10 is determined indirectly by measuring
  the voltage at the 5 mOhms shunt resistor of channel 10.
  Later on, the load is set to standby mode and the low standby current
  is measured directly via the ampere meter of TS-PSAM. Therefore
  the power relay of channel 9 is opened and the standby current is
  bypassed via matrix relays to the analog bus and TS-PSAM module.

  Error handling is not considered in this sample in order to keep it
  easy to read. The return status should be checked for "errorOccurred"
  after each library call.

  The following configuration files are used in this example:

  physical.ini

8 Maintenance, storage and disposal

8.1 Changing fuses

The optional rear I/O module R&S TS-PRIO2 holds 3 A fuses for the low power chan-
nels.

If the module does not work, it is possible that a blown fuse is the cause. The fuses are
located on the side of the module.

1. Turn off the device as described in the user manual of the R&S PowerTSVP.

2. Remove any external power supply.

3. Remove the module from the R&S PowerTSVP as described in the user manual of
    the R&S PowerTSVP.

4. Check the condition of the fuse.

5. Replace the blown fuse. Only use a fuse of the specified type.
    The fuse type and its characteristics are indicated next to the fuse holder.

6. Reinsert the module into the R&S PowerTSVP.

Figure 8-1: Location of the 3 A fuses on the R&S TS-PRIO2

8.2 Storage

Protect the product against dust. Ensure that the environmental conditions, e.g. temperature range and climatic load, meet the values specified in the data sheet.

8.3 Disposal

Rohde & Schwarz is committed to making careful, ecologically sound use of natural resources and minimizing the environmental footprint of our products. Help us by disposing of waste in a way that causes minimum environmental impact.

Disposing electrical and electronic equipment

A product that is labeled as follows cannot be disposed of in normal household waste after it has come to the end of its service life. Even disposal via the municipal collection points for waste electrical and electronic equipment is not permitted.

Figure 8-2: Labeling in line with EU directive WEEE

Rohde & Schwarz has developed a disposal concept for the eco-friendly disposal or recycling of waste material. As a manufacturer, Rohde & Schwarz completely fulfills its obligation to take back and dispose of electrical and electronic waste. Contact your local service representative to dispose of the product.

9 Troubleshooting

If the system is not running properly, try to find the problem with the following tests. If the tests do not help to locate the problem, contact your Rohde & Schwarz service representative.

9.1 LED test

The module has three LEDs on its front panel that indicate its status.

After turning on the system, all LEDs light up for a short time to indicate that the power supply is present and that all LEDs are working.

- A single LED does not light up in that time frame:
  Indicates a faulty LED or faulty LED control.

- All LEDs do not light up during that time frame:
  Indicates that the power supply for the module is faulty.
  Check the status LEDs of the main power supply module in slot A3 and A4.

For rear modules, you have to check the LEDs separately, see "Power-on test for modules with a rear I/O supply module" on page 41.

9.2 Power-on test

The power-on test runs at the same time as the LED test. The following statements can be made regarding the different display states of the LEDs.

- "PWR LED" (green LED) = on
  Indicates that all power supply voltages are present.

- "PWR LED" (green LED) = off
  Indicates that at least one power supply voltage is missing.

- "ERR LED" (red LED) = off
  If the green LED is illuminated at the same time, indicates that the system is working without any errors.

- "ERR LED" (red LED) = on (or blinking)
  Indicates a hardware problem.

Power-on test for modules with a rear I/O supply module

If the green LED indicates a problem with the supply voltage, check the LEDs of the corresponding rear I/O supply module separately. If the LEDs on the rear I/O module also indicate a supply voltage failure, replace the rear I/O module.

9.3 R&S TSVP self-test

The R&S TSVP self-test is an extensive test procedure for the whole system or individual components. After the test is done, you receive a test report for all components that have been tested.

The self-test uses the R&S TS-PSAM module as a measurement unit. The functionality of the modules in the system is ensured by measurements via the analog measurement bus.

For more information about running the system self-test and the test procedures, refer to the R&S TSVP service manual.

9.4 Contacting customer support

Technical support – where and when you need it

For quick, expert help with any Rohde & Schwarz product, contact our customer support center. A team of highly qualified engineers provides support and works with you to find a solution to your query on any aspect of the operation, programming or applications of Rohde & Schwarz products.

Contact information

Contact our customer support center at www.rohde-schwarz.com/support, or follow this QR code:

Figure 9-1: QR code to the Rohde & Schwarz support page

Annex

A Specifications

For an overview of technical specifications of the R&S TS-PSM4 module, refer to the corresponding product brochure / data sheet.

If discrepancies exist between information in this manual and the values in the data sheet, the values in the data sheet take precedence.
