1 Getting Started

The XM Radio waveforms (*.vv) are provided by Sirius XM and can be played on the arbitrary waveform generator (ARB).

1.1 Version History

For information on the current firmware version refer to the release notes of the instrument.

1.1.1 Version 1.00

Initial release.

1.2 System Requirements

The Rohde & Schwarz Web Configurator shows you the required hardware and software options. It is provided in the Internet: On the Rohde & Schwarz Home Page (<http://www.rohde-schwarz.com>), go to the instrument-specific site and configure your product. If you need any further information, refer to the help of the Rohde & Schwarz Web Configurator.

The playback of XM Radio waveforms requires licence and waveforms from Sirius XM

Rohde&Schwarz does not provide the XM radio waveform files themselves, but rather the functionality to playback these files.

Provided that the required options are fitted, you can playback XM Radio waveform files.

1.3 Installation Instructions

Refer to the installation instructions for options provided with the firmware. You can download the current version from the Rohde & Schwarz Home Page ("Quicklinks" - "Firmware").
