1 Installation Package for External Touch Monitor Update

External touch monitors are not supported by default. User action is required. This document describes the update procedure:

To activate the support of an external touch display, you need to execute the installation package "TouchMonitorUpdate-W7_64Bitxyz.msi". The file can be placed on any disk drive, network drive or USB storage device attached to the instrument.

Prerequisite: Operating system Windows Embedded Standard 7 64 Bit

1. Do not connect the external touch monitor via USB before the installation is completed.

2. Start the instrument with an account with administrator rights
    (e.g. the user "Instrument")

3. Open Windows Explorer and navigate to the folder containing the installation package.

4. Start the installation by double clicking the File
    "TouchMonitorUpdate-W7_64Bitxyz.msi"

5. Press "Next".
    The installation procedure starts and may take up to five minutes. A black console window will show up. Please be patient until the process is complete

6. Press "Exit".
    The instrument will perform several reboots.

7. Connect the external display to the instrument using a DVI or DisplayPort cable as well as an USB cable.
