

R&S®OSP RF MODULES: R&S®OSP-B162K, R&S®OSP-B164K

9 kHz to 43.5 GHz, SPDT & SP4T solid-state relays

R&S®OSP RF modules:

R&S®OSP-B162K (Variant 46, left), R&S®OSP-B164K (Variant 44, right)

R&S®OSP OSP-B162K and R&S®OSP-B164K RF modules

Key facts and benefits at-a-glance

- Frequency range: 9 kHz to 43.5 GHz
- Short switching time
- Low power consumption
- Quiet operation; no clicking sounds
- Faster switching cycles; higher throughput
- Long life span; no integrated moving parts for switching
- Ideal for applications that require repeated operation such as production testing

The perfect choice for

Aerospace & defense

Electronic design

RF & microwave components

Production tests

Key specifications

Frequency range	9 kHz to 43.5 GHz
Relay type, connector	Solid-state relay (SSR), 2.92 mm
Relay arrangement and type of relay	R&S®OSP-B162K: SPDT, absorptive R&S®OSP-B164K: SP4T, absorptive
Relay impedance	50 Ω
Number of slots on R&S®OSP base unit	one, single-width module

Your benefit

Switching units are based on standard product of R&S®OSP

Same hardware concept for all RF switch solutions

Same software concept for all RF switch solutions

Features when operating with R&S®OSP open switch and control platform

- World wide service network for standard components
- Combination of standard and special system modules
- Combination of standard OSPs and special units based on OSP concept

- Reduce service cost and development resources

- Same software interface to control different units (SCPI); lower cost for system integration

Feature highlights of R&S OSP open switch and control platform

R&S®OSP220 (top, left), R&S®OSP230 (bottom, left), R&S®OSP320 (right)

- Modular, reliable and cost-efficient
- Compact, secure and flexible
- Powerful control and RF relay modules up to 67 GHz
- Expandable system configurations
- Convenient manual and remote control & trigger function

Operation of RF modules requires R&S®OSP base units.

Easy to install

A single-width module can be installed in the vertical slot on the R&S®OSP320 and the horizontal slot of an R&S®OSP220 or R&S®OSP230

Highly Flexible in design and operation

Flexible system wiring

RF modules can be installed on Front, Rear or both sides of the R&S®OSP base units.

or

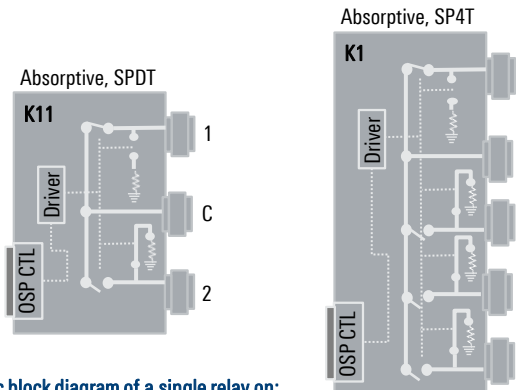

RF modules can also be installed on R&S®OSP-B200S2 satellite units via a fiber optic link or serial electrical bus cable

Simple to operate

R&S®OSP WebGUI: intuitive & interactive graphical display of switch for visualization during path definition
