# FAST DELIVERY!

Your new R&S®RTP-B oscilloscope sent to you inside 7 days\*  
[www.rohde-schwarz.com/fast-delivery](http://www.rohde-schwarz.com/fast-delivery)

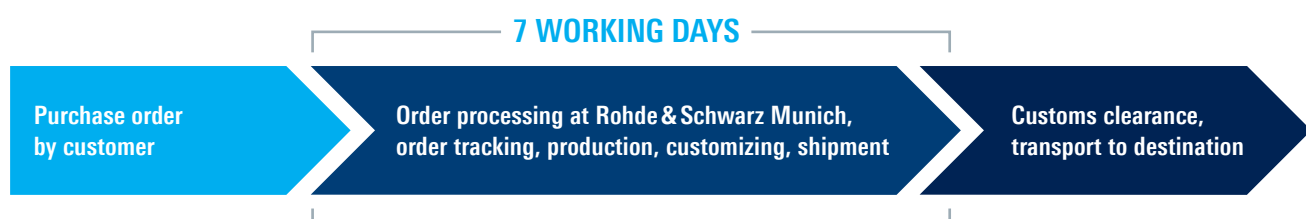

From October 15th 2022 until December 24th 2022, Rohde&Schwarz will get your orders for R&S®RTP (B models) oscilloscopes out of the factory door and on the way to you within 7 working days of our receiving your order. We offer you "fast delivery".

To be sure of having your order fast-tracked through Rohde&Schwarz order-processing and your scopes on the way to you:

- ▶ You will need to be quick to order, too. To qualify for "fast delivery", you will need to order within 10 working days of receiving a quote for R&S®RTP (B models) from your Rohde&Schwarz representative.
- ▶ Make sure your order is for the oscilloscopes only. Any and every internal hardware or software option available for the oscilloscope can be included, but no peripherals; no additional probes, test fixtures, accessories or accredited calibration.

Please note, we are not offering a maximum delivery time of your oscilloscopes from us to you. Once your order is shipped, we have no influence on the transportation time, or the import/export regulations and customs clearance that apply in your country.

A maximum of 7 working days "fast delivery" means the time from when the order arrives at order processing in Munich to the point when the package is ready to be picked up by the carrier at the factory.

\* "fast delivery" inside 7 working days applies to the Rohde&Schwarz in-house procedures from order processing through to available shipment.

## Terms and Conditions for the “fast delivery” orders:

- ▶ Only payment conditions with open account terms (e.g. 30 days from date of invoice) are supported.  
“Fast delivery” cannot be combined with any other payment method; prepayment, LC, or bank guarantee, for example
- ▶ The order must conform to the R&S general terms and conditions, or an agreement between your R&S sales representative and Rohde&Schwarz GmbH & Co. KG
- ▶ Your R&S sales representative is responsible for recommending a valid hardware and software configuration for the requested instrument before the order is placed.
- ▶ “Fast delivery” conditions are only valid for 10 working days from the date of quote. If no order is placed within this timeframe to Munich, any order is subject to standard delivery times.
- ▶ The “fast delivery” campaign is valid from October 15, 2022 until December 24, 2022
- ▶ Additional probes, test fixtures, other accessories and accredited calibration are not available for “fast delivery”. For these articles, standard conditions / standard delivery times apply.
- ▶ “Fast delivery” is only available while stocks last.
